- RESTfull practices
- Heroku/railway hosting
- Git/Github
- HTML, CSS, Javascript, Python
- OOP, MVC, ORM, PWA

Experience

Accountability & Organization

Bootcamp was all about the art of multitasking. Here, we wrote code. Evaluated code. Created tutorials based on newly-built apps. Completed incomplete code on assignment. All while keeping the work clean, concise and efficient.

Teamwork & Interpersonal Skills

To prepare us for real-world professional experience, the Bootcamp built in opportunities for team collaboration and team projects — including group presentations and whole web application creation.

Customer Service & Sales Skills

I've had experience in customer service, retail sales and the service industry. Overall, I'm a team player who believes the main goal of work is to be of maximum use to those around me —and the projects we build.

As far back as I can remember, I've been taking things apart and putting them back together – first bikes, then computers, now websites and servers.

I can't help but imagine the invisible stories being told behind the things we see — and wanting to tell them with more clarity, efficiency and passion.

Clean code always looks like it was written by someone who cares. — Robert C. Martin
